BETTER THAN GOLD.

Better than grandeur, better than gold, Than rank and titles a thousandfold. Is a healthy body and a mind at ease And simple pleasures that always please; A heart that can feel for another's woe, With sympathies large enough to enfold All men as brothers, is better than gold.

Better than gold is a conscience clear,
Though tolling for bread in an humble sphere.
Doubly blessed with content and health,
Untried by the lusts and cares of wealth,
Lowly living and lofty thought
Adorn and ennoble a poor man's cot,
For mind and morals in nature's plan
Are the genuine tests of a gentleman.

Better than gold is the sweet repose
Of the sons of toil when the labors c ose,
Better than gold is the poor man's sleep,
And the balm that drops on his alumbers deep
Bring sleeping draughts on the downy bed,
Where luxury pillows its aching head.
The toiler simple opiate deems
A shorter route to the land of dreams.

Better than gold is a thinking mind, That in the realm of books can find That in the realm of books can find A treasure surpassing Australian ore, And live with the great and good of yore. The sage's lore and the poet's lay, The glories of empires passed away; The world's great dream will thus unfold And yield a pleasure better than gold.

Better than gold is a peaceful home Where all the fireside characters come, The shrine of love, the heaven of life, Hallowed by mother, or sister, or wife, However humble the home may be, Or tried with sorrow by heaven's decree, The blessings that never were bought or sold And center there are better than gold.

DAYS CONE BY.

O the days gone by! O the days gone by!
The apples in the orchard and the pathway
through the rye;
The chirrup of the robin, and the whistle of

As he piped across the meadows sweet as any nightingale;
When the bloom was on the clover, and the blue was in the sky.
And my happy heart brimmed over—in the days gone by!

In the days gone by, when my naked feet were tripped By the honoysuckle tangles where the water

lifes dipped,
And the ripples of the river lipped the moss along the brink
Where the placid-eyed and lazy-footed cattle came to drink,
And the tilting snipe stood fearless of the truant's wayward cry,
And the splashing of the swimmer, in the days gone by.

A WOMAN'S SACRIFICE. In the cold, clear moonlight stood Stanly Martineau, with not a smile on the perfect lips from which in gayest circles wit flowed the brightest. There was a fierce, unsatisfied, burning look in the blue eyes which beauty envied and admired. A dreamer, with burning heart and veins of fire, amid the coldest conventionalities, his words were the most screne even while his heart was

throbbing wildly. He had given his senses up to a sweet, delicious dream since the night the dark eyes of Clara Fernly answered his look Dress White Shirts, of love. With a nature impetuous as well as affectionate, he gave his whole

All feelings, all passions, were concentrated in that one-love for her. Yet in some stray moments-but then only for a moment-a shadow of regret would cross his mind when he thought of talent neglected, and genius which was once his master passion trampled and thrown aside for the love of woman.

were as enervating to him as poverty was depressing and oppressive to others. As he stood in the moonlight, on the night in which the great joy of his life was crushed, a bitter regret filled his heart that he had wasted so much of

Yet a short while before, on the same the smile of her he loved, and the sweet are the sad dramas of the heart-unexpression of his face showed the happiness of his heart. No thought of ambition then-no yearning save for the love of one beside him, who, beneath a heart, because the man she loved had neglected his great genius for her sake. True woman that she was, she determined, let the sacrifice be what it would, to urge him to renewed action and

than his, was truer to his interests. "Go," she said, and her lips quivered with the thought that he would deem free from the pests. that she loved lightly, "Go, and show to the world the genius which I know you possess. Do this, and when you

I had found one who loved me for my-I awaken from the dream to hear you sigh for fame."

"No, no, Stanly! You wrong me! upon this.

accused her of such a false motive. Had he known her nature, could he have read her heart, he would have sacrificed read her heart, he would have sacrificed fested.

Valuable agent in rading the country of the innumerable pests with which the orchard and garden are annually infested.

Valuable agent in rading the country of than to detect one of her boarders entering the house about ten minutes after this neck had he followed it.—[Whitehall Times.]

is greatest hope rather than to have

aused her one heart moan. Pleading with all the eloquence of his

nature, he sought to change her purpose; the music of his voice, the deep pain that darkened in his eyes, the agony of his words, filled her heart with a sweet but anguished love almost forcing her to yield; but she held firm to the last.

He left her with the promise that he would return. In calmer moments came to him the thought that her words were a pretence to reject his love not too conditions to be followed in the purharm and american manufacturers agreed upon certain with indigestion. The firm mouth is lacking, and the picture looks as though harshly; that the consideration for his welfare was but a kind way of dismissing him. Such thoughts flashed through

With her best motives misconstrued she bade him larewell, and watted in loneliness for his return. Often she loneliness for his return. Often she lates of Columbia. A good deal of look up to and admire George Washingalmost repented that she had bidden him depart; her heart yearned for the presence of her love. She loved him, but let not that love interfere with his that finds its most faithful labor repaid

with pain and hope deferred. Doubting her, he thought her love but vanity. He loved, not with faith, but yet with all the passionate power his fiery heart possessed. Thus we see him is the cold moonlight, stunned with the supposed loss of a love sweeter to him than fame or power.

Four years elapsed-years through which Clara had been faithful to her love. Martineau had been faithful to his studies and his work, forgetting Clara in the pursuit of fame. insatiable desire for applause he forgot chemically and medicinally very differ-will never come when any other Amerithe cause, for fame which was the

effect. He was famous; all the malignity and criticism of his jealous literary rivals could not efface the fact that he was famous; men's hearts burned with deeper feeling when they read his words; maiden's hearts were thrilled when they read his poems, warm with passion. All acknowledged the brilliancy of his wit, the keenness of his

He to whom the love of woman was once religion, rejected that love for the love of power. In vain did beauty look smile won an answer from the burning depths of his restless eyes.

Faithful to his word, he returned to Clara; but no love was in his heart. Thinking only of that which would give him a greater name, he forgot her love. Her heart ached for one look of love from those blue eyes, but those eyes plainly told her that love was dead.

It is thus that woman's love is sacricced for man's honor, and he appreciates it not. Released from his promise to Clara,

Martineau married one well known in to Brierton Villa the robin redbreasts were thrilling their merriest lays, while over by the woodshed the haggard outlines of an abandoned hoopskirt through which the daisies were peeping, showed that spring, the most pulmonary and beautiful season of the year, had arrived. In the broad fields that stretched change in the future course of the had any friends left they would compel Had he been poor, he might have away to the westward the farmers were been great ere this; as it was, riches preparing the ground for the seed which, Earth and warmed by the genial rays of the sun, would soon become the ripened grain, yielding to its owner a bounteous harvest, and enabling him to play against bunko when he visits Chicago in the fall. A rudy-faced boy, the literary world, whose name added night, his eyes had softened beneath greater lustre to his own. Ah! many

We are as willing as anyhody to "The establishment of manufactories pay debts, but patriotic love of G. the Government to desist from injuring his reputation by that cow colored stamp.

ALUMINIUM CURRENCY.

Mr. Clinton Roosevelt, a metallurgist who has devoted years of study to metal and their reducing agents, has lately devised a new use for aluminium, which as yet, owing to the great cost of its production, has remained a sort of chemical curiosity. In an interview with a World reporter recently, Mr. Rousevelt said: "I have been considering for a long time how counterfeiting, which has assumed such alarming proportions at present, can be successfully stopped and I think I have discovered it in the metal aluminium. I refer especially to postage stamps and fractional currency. My plan is essentially this," and he took from his pocket a string of punched disks of various sizes, which he laid upon the table. "These are aluminium," he continued, "and represent the intrinsic value of the silver and copper coins See how light they are," and he

held them up for inspection. The be drawn out unless a man has the whole lot had scarcely a perceptible weight. "You cannot counterieit them in any way that could not be detected at once by a blind man, and more, they can be converted into any form desired. Rolled out into sheets it can be stamped into shapes suitable for postage stampsneither stoop nor turn about his head. and in this way affixed to a letter would Nothing can be more ridiculous than be taken off by the postal authorities, in what they wear about their necks, for it is neither a ruff, band or cravat.
